

Khandaker Ziaur Rahman

Full Stack Developer

zrrehan11@gmail.com | +8801793158877 | [Linkedin](#) | [Github](#) | [Portfolio](#)

Summary:

Full Stack Developer with hands-on experience building production-ready web applications using TypeScript, React, Next.js, Node.js, and PostgreSQL. Experienced in role-based systems, REST APIs, payment integration, and multi-panel dashboards across real-world projects.

Technical Skill:

- **Languages** - Python, JavaScript, TypeScript
- **Frontend** - ReactJS, NextJS, TailwindCSS, DaisyUI, Shadcn
- **Backend** - ExpressJS, Node.js, Firebase Auth, JWT
- **Databases** - PostgreSQL, Prisma ORM, MongoDB, MySQL

Projects:

1. MediVault (April 2026)

[Github](#) [Live-Link](#) [Video Explanation](#)

Tech Stack: TypeScript, NextJS, ExpressJS, Prisma, postgresql

- Built a full-stack medicine delivery platform with role-based access control for Customers, Sellers, and Admins, handling the complete order lifecycle from cart to delivery with a LLM to ask questions about particular medicines.
- Implemented secure authentication and authorization with integrated online payment processing and real-time order status tracking (Pending → Delivered)
- Architected clean separation of responsibilities — Sellers manage product listings while Admins control the full delivery pipeline, ensuring operational integrity across the platform

2. Managely (November 2025)

[Github-Client](#) [Github Server](#) [Live-Link](#)

Tech Stack: ReactJS, ExpressJS, MongoDB, TailwindCSS, DaisyUI, Firebase

- Secure authentication via Firebase (Email/Google) with persistent login
- Work log tracking, payroll processing, and salary analytics with charts
- Role-based workforce management app with dynamic dashboards (Admin, HR, Employee)

3. PlayFix (August 2025)

[Github-Client](#) [Github-Server](#) [Live-Link](#)

Tech Stack: ReactJS, ExpressJS, MongoDB, TailwindCSS, DaisyUI, Firebase

- Secure authentication (Email/Google), JWT-protected APIs & persistent login
- Responsive UI with light/dark themes and job status tracking
- Console repair service app with service listing & booking for console (PS4/PS5) repairs

4. Car Appointment Management (April 2026)

[Github](#) [Live-Link](#)

Tech Stack: PHP, MYSQL, HTML, CSS

- Built a full-stack car workshop appointment system with PHP and MySQL, supporting client booking and admin management panels
- Implemented mechanic availability logic — enforcing a 4-car daily limit per mechanic with duplicate appointment detection and real-time slot validation
- Developed an admin dashboard to view, reassign mechanics, and reschedule appointments with full CRUD operations on the database

Education:

Brac University, Dhaka | Bachelor of Science in Computer Science | September 2022 - October 2026 (estimated)
